

A QUICK

OVERVIEW

6M provides focused business and technology solutions to the Life Sciences Industry. We are dedicated to a seamless project journey implementing Precise Strategy, Careful Planning and Flawless Execution.

INDUSTRY + TECHNOLOGY

Our team of industry experts have a proven track record and extensive knowledge of both Technology and Life Sciences. We are here to guide you through the procedural and technical aspects of your Commercial, Compliance or Regulatory journey.

SERVICES:

CUSTOM APPLICATION DEVELOPMENT

Our goal is to bring our customers into the future with modernization methodologies for the entire application suite. From single page framework to full content management services, our team is completely versed in databases, programming & application frameworks.

SERVICES:

ENTERPRISE ARCHITECTURE

6M's team of technical architects hold a unique understanding of technology and industry specific expertise that allows us to provide a customer-centric strategy and design that will innovate your enterprise platform or integrate a new solution through a seamless process.

SERVICES: MOBILE DEVELOPMENT

6M's understands the importance of mobile and responsive page design. Our Mobile Development

Group believes that mobile is the solution to enhance workflow, user adoption and experience.

SERVICES: DATA MIGRATION

6M combines decades of regulatory experience and countless data integration, migration and validation projects. Our vast experience allows us to deliver data programs with true value and sustainability.

SERVICES:

VEEVA

6M provides expert knowledge of the Veeva product suite, including Veeva Vault and Veeva CRM. We are skilled in deploying, integrating and supporting Veeva products in the U.S. and Europe.

MOVING FORWARD: GENOMICS IN THE CLOUD

Based on our background in Cloud Technology 6M is creating new service offerings for Genomics in the Cloud.

We look forward to working in the following use cases:

- Genomics Pipeline
- Workflow Management
- Big Data Analytics
- Public & Private Data Sets
- Collaboration
- Clinical Integration of Genomic Sequencing
